

WHERE WE WORK

Sitting on the fringe of the nation's automotive mecca means that much of our work is performed within the vast manufacturing community found in Metro-Detroit; however being an industrial service provider means that our jobsites are not limited to our own geography. Our home is truly at our client's facilities, and because we have diligently established an International customer base, we are proud to say that Bulldog On-Site Solutions directly serves the entire manufacturing community from coast to coast.

WHY CHOOSE US

Over the years, our dedication to excellence and integrity has allowed our team to work with: OEM's, Tier I Corporations, and manufacturers on all levels. The plants always change, the projects are strikingly different, and the constraints are always daunting. However, the consistency is found when our clients choose to do business with Bulldog On-Site Solutions.

By approaching every project as a unique opportunity, BOSS has steadily delivered results when other contractors have said that the job could not be done. We have always been considered a specialty contractor because of our experience and background in integration and robotics; however as the market has changed and expanded...so to have we evolved to service our customer's needs with a wider scope of services.

OUR MISSION

"Bulldog On-Site Solutions is committed to the belief that safety and quality are not mutually exclusive, and are the fundamental cornerstones of any industrial project. Through this core ideal, and an organizational pledge to transparency and integrity, our team will continue to exceed our client's expectations by consistently delivering projects on time and efficiently."

WHO WE ARE

Bulldog On-Site Solutions is a fully insured turn-key contractor based out of Warren, Michigan. Since the company's inception, we have built a strong reputation for our ability to get done what others cannot. We provide industrial services all over the country for companies large and small, with a strong international base of clients as well. We have taken the time to create a strong network of like minded and trustworthy service providers to ensure that we can always provide the best possible service to our customers, while still maintaining fair pricing for services.

CORE SERVICES

Although we routinely provide a wide assortment of services, machine moving, turn-key machine installation and de-commissioning are our bread and butter. When you do business with us, you will see a similar pattern emerge with our team. Whether you are discussing the quote with an estimator, or discussing the next stage of a project with one of our foremen, professionalism is at the core of everything we do.

TURN-KEY INSTALLATIONS

Single sourced projects for all Industrial machinery

Bulldog On-Site Solutions is able to provide its clients with all of the services required to successfully launch, build, or install their production machinery. While

many of our competitors tout this same capability, very few can deliver results in the same manner. The depth and experience within our firm assures that we are intimately familiar with all areas of industrial projects, and bring with us

the decades of experience required to effectively carry any project through to a timely launch even when only in development phases.

BOSS provides turn-key solutions for a large variety of projects, and has earned a solid reputation of on time delivery and quality of service. We understand that every project is unique, and has distinct challenges and considerations. However, we also understand that the majority of projects require the same base fundamentals: design and build, layout and installation, electrical and piping, and transportation.

MACHINE MOVING/RIGGING

Due Care Machinery Relocation Services

The BOSS team has successfully completed machinery relocations for companies large and small, and in various industries, such as:
